

Introduction

For training and practice, the CA:tCH Safety Plan project has created specific training sites. These sites allow you to enter test plan information and view fake plans, to help you become comfortable with the CA:tCH Safety Plan Portal and WISHIN Pulse system.

Guidelines for Using the Training Sites

- Never enter the personal or health information of a real person into the training sites. All Participants and Safety Plans must be fictional information.
 - Do not enter fictional information into the production sites. The production sites should be for real Participants and real Safety Plans.
 - The other Quick Reference sheets contain links to the **production** sites. Please do not use those links if you are practicing entering/viewing safety plans.
 - Make sure you know which site you're using before entering any information. If you're unsure, look at the URL in your web browser:
 - If the Safety Plan portal shows **Sandbox** somewhere in the URL, you are in the **training** site
 - If the WISHIN Pulse system shows **cert** somewhere in the URL, you are in the **training** site
- If you do not see those key words in the URLs, you are in the **production** site.

Links to the Training Sites

CA:TCH Safety Plan Portal: <https://wishin.sharepoint.com/sites/CAtCHSandbox>

WISHIN Pulse: <https://cert.wishinpulse.org/>
